

Nova Scotia Coordinate Referencing System (NSCRS)

NSCRS UPDATE - January 2016_v001

January 2016 - the Nova Scotia Active Control Stations (NSACS) layer has been updated to:

- List coordinate values and show photos for the new NSACS throughout the Province
- Correct coordinates for SDNY, LSBGY, PTHK and WDSR which were previously biased in the height component by an incorrect antenna model (TRM59900.00 instead of TRM59800.00).
