

## COORDINATE REFERENCING NEWS - APRIL 2016

### NSACS Updates

NSACS updated: Coordinates for the 40th ACS, Gaetz Brook (GATZ) have been published and are now available through the NSCRS Viewer.

### Data Updates

#### NSCRS Viewer Version 1.2.0 released

The following enhancements have been made to the NSCRS Viewer:

- A link to NSACS site logs can now be found when NSACS are clicked on.
- The Coordinate Status shows in red when values are not 'Published' and a link has been added to explain coordinate status meanings
- Users must now accept a disclaimer when viewing the property layer
- The MTM station report layout has been modified to facilitate one page printing
- The 'Enter' key is now disabled when submitting data to prevent unintended data submissions
- New ranges for the UTM northing and easting values have been implemented during data submission (Northing: 1,000,000 – 7,000,000 Easting: 100,000 – 900,000)
- The data submission functionality has been modified to keep the session alive as long as the user is logged in and the browser is open.
- Submitting an observation no longer immediately updates the Status/Status Date in the Station Report. This information gets updated when the observations is accepted.
- The Calendar on the Data Submission forms has been restricted to not allow dates in the future to be entered to prevent erroneous data submissions.
