

Qualifications for Contributing to NSCRS Maintenance

The Nova Scotia Coordinate Referencing System (NSCRS) provides the foundation for the Province's spatial data. Through the implementation of the Nova Scotia Active Control Stations (NSACS) network, users can now contribute to ongoing maintenance of the NSCRS by providing updated coordinated values for NSCMs. Because of the inherent need for quality data, it is necessary to define minimum requirements for credentials for contributors.

To contribute coordinate updates on NSCMs, users shall:

- a) Be a Nova Scotia Land Surveyor (NSLS)

OR

- b) Have a Geomatics Technologist Diploma or an equivalent combination of education and experience, and a written statement of qualification by a NSLS
