

Nova Scotia Flood Risk Mapping

Legacy Data

The flood risk mapping data available through Geographic Information Services is a [legacy dataset from the 1980s](#) (in DXF file format only). The areas available are Antigonish, Pictou, Truro, Bedford, Sackville, and Lower Sackville. This dataset is available under restricted data use license free of charge.

Contact your Municipal / First Nations office to see if more up-to-date mapping is available.

Or visit the [Maritime Coastal Flood Risk Map application](#) from AGRG.

Federal Data

For Federal data related to flood mapping, visit NRCAN's [Data related to flood mapping](#) as well as the Earth Observation Data Management System [Download Emergency Flood Maps](#) .
